Concerning K-Love Radio Network Heard on 91.1 FM
Denver, Colorado

K-Love is my radio station of choice and has been for over two years. I long ago grew weary of the constant derogatory comments and sexual insinuations, and the sometimes unbelievable profane language I was hearing on other stations.

The air waves are available to everyone with a cheap radio, and the young people of this country listen to music just as much or more than the adults do. K-Love provides uplifting, positive, quality music without all of the cheap rudeness that other stations promote and seem to cherish.

If K-Love were to be displaced from the air waves with some other radio station (LPFM), what would replace it? This would only further the moral decline of the local and general community by taking away one of the *very few* optimistic and encouraging stations to be heard on the radio. K-Love provides an excellent alternative, and it is in the public's best interest that this station stays on the air. Lives are enriched everyday with K-Love, I know this because my life is a living testimony.

We have enough of the disrespectful and vulgar stations to listen to, please do not take away K-Love.
